

Bialik College sustainability honours

BIALIK College's commitment to the environment was recognised at this year's Boroondara Sustainability Awards, with the school taking home the gold award for its Indigenous

Garden and a commendation for its Sustainable September program.

The awards recognise the work local schools undertake to embed environmental sustainability within the school curriculum, encouraging critical thinking around sustainability issues and inspiring ongoing initiatives.

Bilaik's Indigenous Garden project

promotes the use of local fauna, restoring the original vegetation to the school grounds.

Meanwhile, during Sustainable September, the students are encouraged to take on a more sustainable lifestyle by learning to make simple changes that have a positive impact on the community and environment.
