

Year 10 Bialik students at Moose Toys as part of their chosen industry visits.

Looking towards the future at Bialik

YEAR 10 students from Bialik College took to the streets as they explored industries and places of work that appeal to them.

The purpose of the visit was to offer students real-life examples of work places and to give them firsthand knowledge about a chosen area of work, the types of jobs available, the skills used and the day-to-day activities from particular jobs.

Students were given a short tour of their chosen workplace, a brief informal talk from a range of different people within each particular industry and an opportunity to see some examples of work.
