

# Back to the future at Bialik College

BIALIK College students travelled into the future last month after the school hosted a programming workshop for schools within the Boroondara Gifted Network. The workshop aims to teach students with autism a new skill or understanding through an interaction with innovative technology. Headed by the head of elearning and library Roxanne Ciddor, students were led through writing successful programs for Rosie, Bialik's humanoid robot. Students were taught how to program and storyboard before creating, testing and refining their programs.

**Rosie – Bialik's friendly humanoid robot.**
