

Bialik year 7s repairing the world

AS part of the Bialik College Bnei Mitzvah program, year 7 students will devote their time to tikkun olam (repairing the world).

At the end of last month, the students were introduced to the concept of "charity begins at home". The idea resonated strongly with the students.

To turn the concept into action, the year 7s were split into volunteer groups and were given tasks to complete around the school.

Tasks included assisting the sorting of puzzles in the Early Learning Centre, rubbish collection from around the school and helping out the maintenance department.

VCE desks were scrubbed clean, buttons were counted for the Button Project and the Bnei Mitzvah tablecloths were ironed to perfection.
