

VCE 2014

Gabrielle Hayman

BIALIK COLLEGE
99.95

GABRIELLE Hayman was pleasantly surprised when she received her results on Monday morning, the highest possible ATAR, musing “I certainly hoped to do well but I wasn’t thinking it was going to be that!”

Her subjects included religion and society, mathematical methods, accounting, chemistry, English and specialist maths, with English faring as the best result.

Hayman said she hopes this paves the way for entry into her life-long dream of studying medicine.

“I can’t really imagine doing anything but medicine. It’s really been the one that stands out for me,” she said.

Her favourite subject was chemistry but said she never tired of studying for all her subjects.

“I tried to maintain a balance, I definitely didn’t stop myself from going out with friends or seeing family if I wanted to.

“I never worked to the point that I hated it, I actually always enjoyed studying, so it didn’t feel like a chore to me.”

Hayman recommends that future VCE students maintain a healthy lifestyle and healthy headspace to achieve the best results.

“Don’t over think it too much, try and stay calm and not expect too much from yourself because it can make it seem harder than it is when really all you have to do is do your best.”

While the final year was “hectic” and exams were stressful, she said it was the most enjoyable period as she watched her classmates support each other.

“Everyone was very supportive, it was a very nice environment.”
